# Mobile Computer

Honeywell's Dolphin™ CT60 mobile computer is designed for enterprises that require anywhere, anytime real-time connectivity to business-critical applications and fast data capture capabilities in a highly durable, longlasting form factor built for maximum uptime and productivity out in the field or on the selling floor. Built on the Mobility Edge™ platform, the CT60 offers an integrated, repeatable, and scalable approach based on a common hardware and software platform unleashing customers from constraints faced today around integration and inflexible technologies without sacrificing enterprise security, reliability, performance or management features.

Juggling multiple devices across the enterprise introduces time- and cost-intensive complexities for Enterprise IT to manage and maintain. The CT60, with Honeywell's Mobility Edge platform, enables customers to accelerate provisioning, certification and deployment across the enterprise. The CT60 offers an extended product lifecycle across four generations of Android  $^{\rm TM}$ , from Android Nougat to Android Q, to maximize return on customer investment and provide a lower TC0. The CT60's advanced enterprise lifecycle tools greatly simplify frequently repeated tasks such as software updates, training of new employees, and managing spare pools.

The CT60 is packed with features to keep workers connected and productive all day long. The industry-leading advanced network connectivity facilitates large file transfers, video streaming, and quick remote access to business applications with enough battery power to last an entire shift. Fast, accurate 1D/2D scanning and data capture is possible even on most damaged barcodes. The rugged design withstands accidental drops and falls, yet is ergonomic and lightweight for comfortable, everyday use. A vivid 4.7" Corning® Gorilla® Glass touchscreen display is easily read indoors and out, and can be used with finger, glove, or stylus.

The Dolphin CT60, built on the Mobility Edge platform, delivers real-time connectivity, advanced data capture, and future-proof investment protection.
